

Farmora — Prices & Government Schemes Guide

Farmer reference guide

Live mandi prices are shown in Farmora → Crop Market. This PDF does not invent or freeze a “today’s price”; prices should be checked in the app because market records change.

Crop Market

- Crops, fruits and fisheries are separated into their own market tabs.
- Use State, District, Market and Date filters when available.
- Live AGMARKNET/data.gov.in records are labelled as live data.
- If the live service is temporarily unavailable, Farmora can show the last successfully saved market records on the same device instead of inventing a price.

Government Schemes

Scheme	Purpose / benefit
PM-KISAN	Income support for eligible farmer families; check the official portal for current eligibility and status.
PMFBY	Crop insurance support against covered crop losses; eligibility, notified crops and premium depend on current rules.
Kisan Credit Card (KCC)	Credit facility for eligible agricultural and allied activities; terms depend on the lending institution.
Soil Health Card	Soil testing and nutrient-management information to support balanced fertiliser use.
PM-KUSUM	Support related to solar pumps and renewable-energy applications in agriculture; current component eligibility must be checked officially.

Important

Always open the official scheme portal from Farmora before applying. Eligibility, benefits, documents and application rules can change. Farmora is an information assistant and does not approve applications.
